Evolution of the Desk

2014

The digital revolution

From connectivity to connectedness

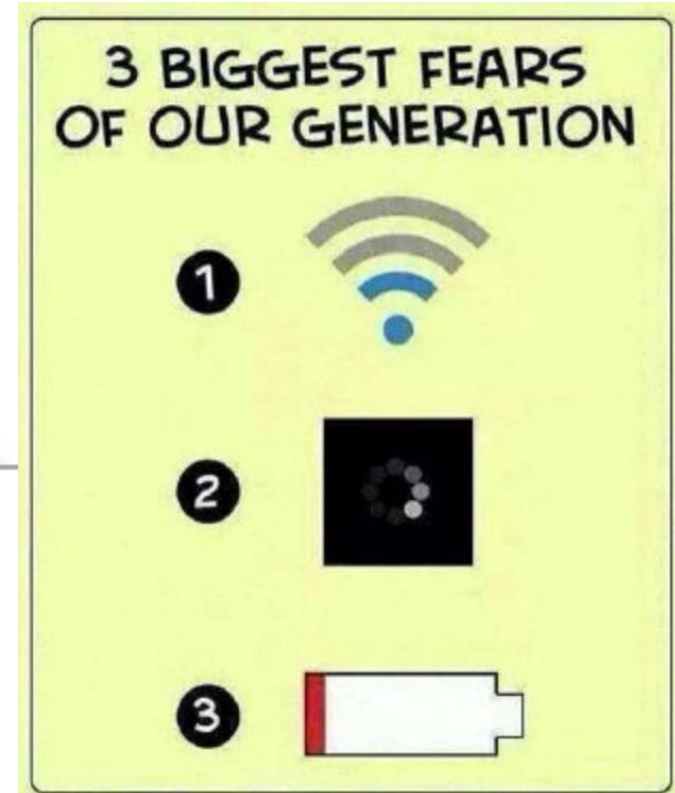

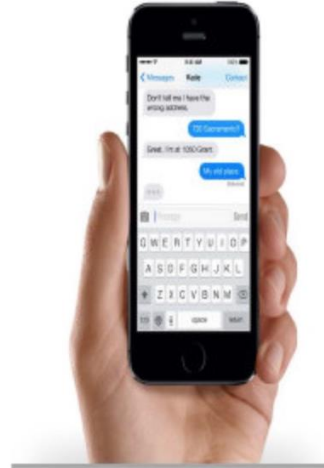

Power has shifted to the individual.
Your mobile is becoming the remote
for your life, democratising access to
people, things and information.

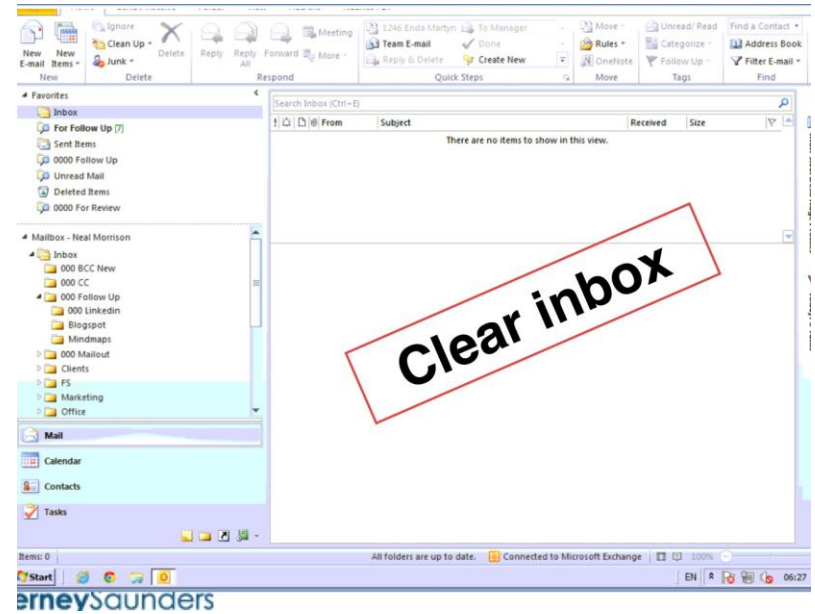

**The digital economy rooted in
connectedness and data.**
A new era of connectedness, powered
by mobile, will power digital Britain.

The future is Mobile

- **97%** of students now use text messages as their main form of communication
- **54%** of smartphone users use the phone in the bathroom

Future of Work

By 2019, approximately **one quarter of the entire U.S. workforce will be independent workers** (self-employed, independent contractor, freelancer, temp contractor, etc.).
